

Foundational Community Supports supporting documents during the enrollment pause

Washington | Medicaid

During the enrollment pause, we kindly request you refrain from sending chronic homelessness attestations for initial Foundational Community Supports assessments due to their time-sensitive nature and the uncertain duration of the enrollment pause.

Any chronic homelessness attestations received will regrettably be rejected and not saved. However, all other supporting documents, such as diagnosis validation documentation, can be submitted and will be collected as they will assist with future enrollments when the waitlist is lifted.
